OCCUPATIONAL THERAPY TRAINING HELD AT OLEKEMKE METHODIST CHURCH ON 2nd DECEMBER 2016

TIE AND DYE TRAINING & BEAD WORK

Objectives

- Round table sharing from participants
- Tie and dye processes

The meeting started with a word of prayer from Hannah Makana at around 12.45pm. Participants shared that they were fine and doing well. Joan welcomed the trainer Mrs. Christine who started by telling participants that the main aim of the training was to empower the group so that they could later be able to do the same, for economical self-reliance. She led the group into the processes used in tie and dye and the components required, including:

- Two different types of chemicals
- Different colours of dyes
- White cloth (pieces).
- Wool/bladders for tying the piece of cloth to make different patterns
- 10 small buckets used for mixing the dyes
- Hot water for mixing the dye
- Two big basins and a bucket used for washing after dying
- Soap for washing the cloth

The processes used include:

- Cutting the cloth into the desired size.
- Using different types of things like stones, bottle tops, different types of beads etc., tie them in to the cloth with the wool/bladders.
- After that, use the chemicals to mix with the dyes.
- Dip the cloth into the dye and give it time before moving it.
- Wash the cloth to remove any extra dye or any running color
- Then air the cloth to dry.

The group had a session to train in bead work; they made different bracelets with different beads.
